

CLOSING VALVE LUN 5663-8

The closing valve closes the air supply from the compressor motor into the air-conditioning or defrosting circuit.

Technical Data

Working medium	Air
Max. working temperature of air (with pressure 1 MPa)	+430 °C
Max. pressure before the flap (with 280 °C)	1.4 MPa
Minimum flow of air with temperature 256 °C and overpressure 0.4 MPa	670 kg.h ⁻¹
Time of valve transition from open to closed position with the overpressure 1.3 MPa	
- at 28 V DC in normal environment	max. 2 s
- at 18 V DC (with temperature -54 °C)	max. 5 s
- at 18 V DC (with temperature +85 °C)	max. 3 s
Working environment	-55°C to +85 °C
Weight	max. 1.1 kg

Dimensions (mm)
