

PRECOOLER LUN 5664-8

The pre-cooler is designed for cooling the air flowing from the jet engine compressor in two separate compartments.

Technical Data

Working medium	air
Max. pressure of cooled air with temperature 280 °C	1.4 MPa
Max. temperature of cooled air with pressure 1 MPa at the pre-cooler inlet	430 °C
Max. temperature of cooled air at the pre-cooler outlet	300 °C
Working environment	-55°C to +85 °C
Weight	max. 5.6 kg
