
PRECOOLER LUN 5681.5-8

The pre-cooler is designed for cooling the air flowing from the jet engine compressor.

Technical Data

Working medium	air
Max. pressure of cooled air (at 280 °C)	1.4 MPa
Maximum temperature of cooled air (at pressure 1 Mpa)	+430 °C
Pressure descend of the cooling air in the pre-cooler	7.355 kPa (underpressure)
Cooled air temperature gradient	min. 300 °C
Working environment	-55°C to +85 °C
Weight	max. 3.8 kg
