

INLET FILTER LUN 5685.5-8

Inlet filter is a front device of the control branch of pneumatic control of the air-conditioning system. It supplies clean air for correct function of the pneumatic control equipment.

Technical Data

Working medium	air
Maximum temperature	+95 °C
Maximum pressure	1.4 MPa
Filtering property	20 µm
Pressure loss with pressure 0.59 MPa and temperature 20 °C	max. 10 kPa
Maximum permissible air leak with pressure 0.59 MPa and temperature 20 °C	0.8 kg.h ⁻¹
Working environment	-55 °C to +85 °C
Weight	max. 0.3 kg
